

March 16, 2017

To our constituents:

Over the last week and a half, many have voiced disappointment and frustration regarding the recent changes to Student Health Center operations. We share these concerns, and the Executive Board Members of both the Graduate Professional Council (GPC) and the Missouri Students Association (MSA) are equally troubled by the announcement made by the Student Health Center regarding visit charges.

GPC and MSA have been working diligently with the Chancellor's office to solve this issue and are happy to report that mental health visits will not incur an extra charge or copay. Students will not experience changes in their access to mental health services at the Student Health Center as originally stated.

GPC and MSA has been in constant communication with administrators about this change, and we are advocating for a complete reversal of this new plan. We are committed to working together toward resolution.

Sincerely,

Rachel E. Bauer
GPC President

Sean Earl
MSA President
